- HTML5/CSS3

INTERNSHIPS

Oil And Natural Gas Corporation | June 2024- July 2024

- During my summer training/internship at ONGC, I worked in a team of three members to develop a guest house booking portal. This portal allows ONGC employees and their guests to book rooms at various ONGC guest houses. The system also includes an admin interface for managing users and bookings.

PROJECTS

To-DoApplication

- A To-Do application that allows users to add, delete, and edit tasks seamlessly. Additionally, users can search for tasks by date, making it easier to manage deadlines and stay organized.

AlgorithmVisualizer

- Algorithm Visualizer is a web application designed to visually demonstrate the inner workings of various algorithms. It provides an interactive and educational platform for users to see how different algorithms function step-by-step, making complex concepts easier to understand.

EduPortal

- A student-teacher portal that connects students and teachers. In this portal, students can view their personal details and registered courses, while teachers have the ability to assign courses.
